### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach and/or suggest a device for measuring at least one parameter of an extruded flat conductor cable in a water bath that follows the extruder, characterized in that, in combination with the other recited elements, the device is provided with a guiding device that comprises an interior space, is located inside the water bath and is filled with water, the guiding device being provided with a slot, the flat conductor cable being guided across the slot so as to make contact or at a short distance thereto and that the slot extends crosswise to the longitudinal direction and the ultrasonic head is arranged inside the interior space of the guiding device and transmits ultrasonic waves in the direction of the slot.

The prior art of record also fails to teach and/or suggest a method for measuring at least one dimension of extruded flat conductor cable (dimension being defined by Applicants arguments as "e.g., the wall thickness of the insulation on both sides (top and bottom), the thickness of the insulation on both ends (left and right), and the distance between adjacent conductors") in a water bath after it leaves the extruder, comprising: emitting sound waves from at least one ultrasonic head substantially perpendicular onto at least one side of the flat conductor cable; and measuring the at least one dimension based on at least one reflected ultrasonic echo; wherein the ultrasonic head is either displaceable crosswise to the longitudinal direction of the flat conductor cable or a stationary ultrasonic element row that extends across the width of the flat conductor cable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. **Fontaine (US 4,258,573)** teaches utilizing a guiding device to test a long continuous strip test object. However, **Fontaine** fails to teach and/or suggest determining the dimensions of the continuous strip test object as it passes over the ultrasonic testing apparatus.
